## Space Memory Game Instructions

1. An adult should cut out all of the squares — on the lines.
2. Talk about each of the pictures; what it is, if you've seen it, etc. Conversation grows learning!
3. Mix up the squares and lay them face down.
4. Take turns turning over one card and then seeing if you can find the matching card. If you find a match, you can keep both cards.
5. If nine pairs seem intimidating for your child, feel free to start with fewer pairs!
6. Have fun!
